

## *I Love You Like the Sun*

I know that loving you really is so strong  
And I know you could never be away from me too long  
Angels laughing on golden wings, Keep dancing on silver strings  
Surround your heart with wondrous things and let your dreams unfold

Sea winds and cockleshells and castles made of sand  
In sweet dreams together, we're walking hand in hand  
Oh I need you safely in my arms. Ill bring you rest I'll bring you calm  
And if your ever fallen down I'll mend your broken heart

I love you like the sun, Oh I love you like the rain  
I love you like the sun, I love you like the rain

Moonbeams and flying stars and wishes in the night  
Singing so softly, now everything is gonna be alright  
Because there's a place for all of us on the white wings of Pegasus  
Fly home to the innocence that we've always known

I love you like the sun, Oh I love you like the rain  
I love you like the sun, I love you like the rain

Don't be caught in dark and winding passageways hold onto these days,  
these days, hold on

Look for light in the rising sun  
Look for the clouds when the rains have come  
And just remember that I'm the one who's watching over you  
I'll be watching over you

I love you like the sun, Oh I love you like the rain  
I love you like the sun, I love you like the rain
